The Swill Hilk Exciten On our third page will be found an expose of the New York Swill Milk business. Its sicken-

ing details will asionish and borrity the reader.
The attention of the people of New York has evil, without any practical result, until the matter was taken in hand by Frank Leelin, publisher of Lesis's Illustrated Paper. He brought the subject before the public with a wigor and careers sincerit, which will, without doubt be attended by the very best results. Every possible obstacle has been thrown in the way of the investigation now being presented. Threats of personal violence have been made —and 'violence has already been committed —to deter Mr. Lastau from prosecuting this good work, but he promises to persevere until' the last vestige of this great crime which has slanghtered its thousands, shall be obliterated. In this good work he should have the generous

Steam Fire Enginel in Philadelphia. The Pailadelphians have bought several steam fire engines and have resolved upon their employment at fires. The fire department of that city has degenerated into an orgadiary rowdies and vagabonds. While

the Democrals were in power, no page me could be wrought, as the leaders were afraid of the rowdy firemen, and dependent upon them for votes, ballot box staffing, election fighting and abenting generally. But since the election of the Republican candidate Hanny, for Mayor, and the accession of a Republican administration to power, a reform in the tire department has been commenced. Steam fire engines is one step in the steep of incommenced. next, and the disbandment of all the worst vol-unteer companies is a third step, already taken, in part. The people of Philadelphia are flat-tering themselves that before a year expires tering themselves that before a year expires they will enjoy a decent, quiet, vigorous fire department, armed with a battery of steam ma-chines. The establishment of the Department on such a basis will work injury to the Democracy without doubt, as it will cut down and disperse one of the best organized divisions of that party; but, in propertion as the perty suffers, the city will gain, in public safety, public

Piret Day-Morning Sessi Second Presbyterian Caurch at 11 £ m. yester-day. A large number of delegates were in attendance, and the church was filled with visers from abroad and the members of the denation from the different congregation

The exercises were opened with prayer, by the Rev. HENRY S. ROWLAND, of Newark, N. J.; after which the opening discourse was delivered by the Rev. Samuel. W. Fismen, D. D., of Cincinnati, from the text found in the Acia of the Apostles, chapter ix, verse 31; "Then had the churches rest throughout all Gal-fles and Samaria, and were edified; and walking in the fear of the Lord and in the comfort of the Holy Ghost were multiplied."

The Rev. gentleman said that thus had ended the first persecution of the Church of God. They had entered upon and tested Christ's sufferings. Then came a period of repose. This persecution had not been without its mighty effects for good. It had made the Apostelle Paul the grandest figure of the Apostelle era. Now peace gave time for the edification of the Church.

Now peace gave time for the edification of the Church.

From this we see that conflict rather than rest is the means of advancing the Church The progress of the Church has ever been marked by conflict—inward and ontward. Conflict was both advantageous and disadvantageous. Its first bappy result in the case mentioned in the lerit consisted in its scattering the Apostles abroad. It taught them Christ's bree command: "Go ye into all the world and "preach the Gospel to every creature." It exactly be the Wildom of their Lord's saying to the Woman of Samaria: "The hour "cometh when ye shall neither in this mountain on yet at Jerusalem worship the Father." Persecution has indirect advantages. It gives motoplety to great truths which otherwise might be buried in the bosom of Church, It enlists the sympathies of the world, which yout spot taboously to the down-trodden and the suffering. Persecution also had its benign effects upon those who are made the subjects of it. Now exacts the time for trying the power of faith. To se whose faith is vital stand firm like onks upon the mountain side whose roots chasp around the weethering rocks. Now the resurrection of the Lord is fait. The agony of the Saviour shines for the the vision of the disciple in brilliant clearness.

she Saviour salines forth to the vision of the disciple in brilliant clearness.

The crowded state of our columns compais as to can't his remainder of our citatio of Dr. Franca's shoused discourse. We understand that it is to be politicated in pumpised form.]

The Rov. gentleman concluded by an alfusion to the separation of the General a susmibly into its Northern and Southern divisions at the meeting of last year in Cleveland. He said we assemble here amid scenes which the Church had never witnessed before. Yet sadness steals in upon our hearts as we miss the greetings of many who were accustomed to occupy places in the General Assembly. Deeming it better to build up a plainform foreign to say free institutions, they have chosen to organize another Assembly. We know that the issue which has culumnisted in this untoward result was forced upon us, yet we can but pray for their peace and prosperity. If we have been moved to acts of an unfraternal nature—if in endeavoring to apply our principles to sins whose recognition we could not if we would avoid, we have been betrayed intel harshness of janguage or tion we could not if we would avoid, we have been betrayed into harmness of language or epirit,—we crave forgiveness. We see the hand of God in all. For twenty years we have been undergoing a baptism by fire. We are now brought forth more powerful than before. Never before have we occupied so loftly a position; fever before lave we had such opportunities for good. What are Assemblies worth it they are marked by no advancement of the Church? Let us adapt ourselves to the field before us. Let the Churches develop themselves in the spirit of their wise and glorious Constitution and principles. Let us now unite in the prayer, "Give ear O Shepherd of Israel."

After the benediction was pronounced, the Assembly was called to order by the Medicator of lest year; and on motion the Assembly adjourned to three r. s.

The Assembly met at three r. w. and was opened with prayer by the Moderator.

The Clerk called the roll and reported one

The object is, perhaps, worth an ef-
